

PINCROFT

ENERGY MANAGEMENT POLICY

Pincroft is fully committed to making efficient use of energy on site and during its activities. We believe in preserving natural resources, reducing atmospheric emissions and helping to mitigate the effects of climate change. This will deliver a healthier and more sustainable environment, as well as associated cost efficiencies, to the benefit of our people, customers and the communities in which we operate.

We commit ourselves to:

- Maintain ISO 50001 energy management system in accordance with the principles established for the site.
- Achieve long term reduction in our energy consumption. We shall adopt a multi-pronged approach to continually improve energy efficiency in all our processes which affect energy consumption.
- Set energy performance indicators and establish a clear reporting structure with defined responsibilities.
- Establish a framework for setting and reviewing our energy objectives and targets. This should ensure necessary resources are allocated and information is available to encourage success.
- Regularly monitor our energy consumption and produce an annual review. Highlight and act upon different factors responsible for significant energy consumption.
- Compliance with all energy legal requirements, regulations codes of practise in existing operations, upgrades and new developments, and other requirements to which the organisation subscribes. Establish common standards for the management of energy efficiency in all areas of the business in which it operates.
- Management will lead and promote energy efficiency programmes.
- Pincroft is committed to continual improvement in energy performance by improving the use of energy resources on site during its activities, throughout their entire life cycle.
- Improve employee awareness and encourage the sharing of experiences and expertise.
- Communicate reliable and transparent energy information to all employees in order to keep awareness and commitment at a higher level.
- Compliance with this policy is the responsibility of all individuals who take part in the Pincroft's operations and activities.
- Procurement of energy efficient products across the site in support of reducing energy consumption.
- Design energy performance improvement opportunities for new, modified energy processes and equipment. Pioneering new techniques and optimising existing technologies wherever possible.
- Management will support the procurement of energy efficient products and services.
